3.6 SERVICES FOR GROUP 3 - PWWM**3.6.1 DETERGENTS FOR THE ATLANTIS VEHICLE WASH FACILITIES**

This group is for the purchase of detergents. County staff will be responsible for dispensing delivered detergents. The brand names/model numbers listed below or an equal product (See Section 2, paragraph 2.13):

<u>Detergent #</u>	<u>Brand Name</u>	<u>Description</u>	<u>Product Number</u>
Detergent 1	King-Pin Powder	Premium Heavy Duty Large Vehicle and Equipment Cleaner (Moderate foaming caustic powder)	Product # M81
Detergent 2	Z-Maxx Shampoo	Concentrated Carwash Shampoo with Foamaxx Technology.	Product # M932
Detergent 3	Zep Low pH Vehicle Presoak (XT-2496)	High Foaming economical low pH presoak. Can be used in cloth and touch-free wash or can be used in a single step or two-step cleaning process.	Product # 8983
Detergent 4	Zep Formula 75	Rinse Agent	Product # 0587

3.6.2 Current Washing Procedure:

- A. The wash facilities operate on a two-step detergent system, consisting of three (3) detergent types and a drying agent. Detergent No. 1 is a powdered high pH (the pH will be between 12.2 – 12.6 in a solution of 1:100) alkaline Chemical. It is mixed with water and is contained in detergent drum number one. Detergent No. 2 is a surfactant and is contained in the second detergent drum. Detergent No. 3 is a low pH compound and is contained in the third detergent drum.
- B. During the step 1 operation, detergents number 1 and 2 are pumped and mixed as they come out of their respective containers and are sprayed over the truck to be washed. In step 2, detergent number 3 is pumped and sprayed over the first two detergents mix. The vehicle is washed with recycle water and sprayed under high pressure (touch less). After the detergents are washed off, a drying agent is sprayed as a final step and the truck wash completes its wash cycle.
- C. This system does not have a drying cycle. The drying agent is to expedite the natural drying process. It is estimated that eighteen (18) percent of detergents are mixed with eighty-two (82) percent of water. Most of water used in washing the vehicles is recycled through the Water Reclamation System previously described in paragraph 3.4. Fresh water is used only to replenish the water loss due to evaporation and/or overflow.
